

EDUCATION

Cornell University

Ph.D. in Astronomy and Space Sciences.

Ithaca, NY

2021–Present

Pontifical Catholic University of Peru

B.Sc. in Electronics Engineering. Ranked top 10% of graduating class.

Lima, Peru

2011–2016

- Thesis: “Design of a LabVIEW-based polyphase filter bank spectrometer for radio astronomy using FlexRIO FPGA technology and CUDA-enabled GPU”.

EXPERIENCE

CCAT collaboration

Graduate Research Assistant. Advisors: Prof. Gordon Stacey and Prof. Michael Niemack

Ithaca, NY

2021 –Present

- Design, fabrication and deployment of state of the art sub-mm instrumentation for the CCAT collaboration.
- Astronomical instrumentation: Mechanical design, Optics, RF and microwave engineering, cryogenic cooling systems, superconducting detectors, and readout electronics.

Atacama Cosmology Telescope

Site Engineer. Supervisors: Prof. Suzanne Staggs and Prof. Mark Devlin.

San Pedro de Atacama, Chile

Oct 2019 –Jul 2021

- Ensured the continuous and smooth operation of all of the telescope’s subsystems, such as a the cryogenic cooling system $\sim 90\text{mK}$).
- Performed calibration procedures like the alignment of the receiver and the primary and secondary reflectors through high-precision photogrammetry ($\sim 10\mu\text{m}$). Carried out frequency response measurements of the detector arrays through Fourier Transform Spectroscopy.
- Participated in the deployment of the Advance ACTPol low-frequency detector array (27/39 GHz). Assisted in the installation of the new chain of filters and cold silicon reimaging optics.

Management Solutions

Assistant Business Consultant

Lima, Peru

Sep 2018 –Jul 2019

- Worked in big data and bank stress test for a major local bank. Also worked in software development and data science for a leading financial institution in Madrid, Spain.

Institute for Radioastronomy

Research Engineer. Supervisor: Prof. Jorge Heraud

Lima, Peru

May 2017 –Aug 2018

- Worked in the design and construction of an 8-meter diameter radio telescope (RT8). Designed several hardware and software systems for the telescope’s electromechanical pointing system.
- Assisted in the design and characterization of an hydrogen 21-cm line feedhorn and its RF over Fiber (RFoF) frontend. Developed an antenna test system based on a custom-made positioning goniometer and software-defined radio technology.

TEACHING

- **Teaching Assistant** at Cornell University Fall 2022, 2024, 2025
Multiwavelength astronomical techniques (ASTRO 4410)
- **Teaching Assistant** at Cornell University Spring 2023
Our Solar System (ASTRO 1102)
- **Teaching Assistant** at PUCP Aug 2017 - Dec 2017
Space Science and Engineering (ING306)

SKILLS

- **Programming:** Python, C/C++, CUDA, LabVIEW
- **CAD:** Solidworks, KiCAD
- **Tools:** LaTeX, Git, Docker
- **Other:** Ansys Zemax Optics Studio, Wilderness Advanced First Aid (WAFA) certification

SCHOLARSHIPS AND AWARDS

- Beca de Estímulo Académico Solidario (BEAS) 2013–2016
Fully-funded (tuition, health insurance and stipend) undergraduate scholarship for outstanding academic performance and financial need.
- Young Scientist Award Aug 2017
Merit-based registration fee waiver and travel grant to attend URSI 2017, Montreal, QC.
- Summer School of Astronomical Instrumentation, Dunlap Institute, UofT Jul 2019
Merit-based tuition waiver and travel grant. Toronto, ON.
- CASPER Workshop, Harvard & Smithsonian Center for Astrophysics (CfA) Aug 2019
Merit-based fee waiver and travel grant (invited, could not attend). Cambridge, MA.
